Precedens secundus Tomus Volatiliū Icones, quæ Brasilia habet, complexus est: quo vero ordine fuerint disposita, idem Tomus ostendit in limise. Nunc. a. Animalium genus prodit, Duce Homine, omnium Principe: ideoq; cæteris animalibus præficiendus, ac in principio statuendus. Hujus locum tenens est simius, actionum humanarum præcipuus limitator & tanquam histrio. Quippe non tantum actionibus suis se homini conformem; sed & corporis partibus efficit. Si namq; sceleton ejus intuearis, demasq; superiorem maxillam cum inferiore, infantis ossa jures humani. His eadem forma, structura & connexione sicut in homine muscoli adaptantur, ut iisdem nominibus veniant, quibus hominis muscoli insigniuntur. Demum interna corporis organa, paucis exceptis, hominis quoq; viscera inferiora & forma & structura referunt. Adjunguntur simiis cercopitheca, quæ caudis saltem à simiis differunt. Deinde felēs, mures, cuniculi, vulpes, canes, lupi, taxi, et horum genus: quorum omnium ratio ordinis facile ex formis suis & actionibus cognatis per se patet. Horum pedes in digitos sunt divisi, ut comprehendere digitis objecta, vel radere atq; ad se trahere possint. Sequuntur deinceps animalia, quorum pedes ungulis præditi in pauciores partes, quam digitos, dirimuntur, uti sunt: sues, capreoli, cervi, boves, equi, oves, &c. Essi autem ordinarie horum ungula in duas partes anteriores sulcantur; suis tamen Brasiliensibus quibusdam Natura pro ungulis tanquam quinque digitos adaptavit. Nos quoq; hoc ipso Anno M.DC.LXIV. in Marchia nostra, præterita nimirum hyeme, cum venationibus aprorum, quas Serenissimus Noster ELECT: animi laxandi causa suscepit, interfuimus, interemptum à Serenissimo ingentem inter cæteros aprum vidimus, cujus priores pedes in quinque ungulas erant fissi. Natura sic varie in omnibus operibus ludente. Præterea hoc ipso in Tomo, quia spacium superfuit, Insecta locanda duxi. Sunt enim imperfecta animalia, quorum ortus Antiquitas omnis putredines statuit. Cum vero amphibia videantur habere mediam inter animalia & plantas naturam, rectius hic in fine Tomi hujus ea collocanda putavi, quo viam quasi sternerent Vegetabilibus Brasiliens: sequenti Tomo Quarto & ultimo inserendis.
